Amanda Roberts, Principal

Cynthia Percy, Vice-principal

Our Mission:

"We promote cooperation, respect
and consideration in support
of individual growth and learning

September 2015-2016

Consent for my Child to Use Online Applications (programs)

Student Name:

(Your consent will be valid to the completion of this school year, and must be renewed yearly if needed. Parents may terminate consent at any time by contacting the principal.)

Many computer programming companies are providing application (apps) online for public use. These apps permit students to create, and have access to documents from anywhere they have a smartphone, ipad or computer. They also permit students to store their work, demonstrate their learning and complete assignments online.

Signing up for, or the school purchasing these apps sometimes requires the school to provide private information, to create accounts for students to logon and logoff. In order for the school to provide that private information, we need the parent's/guardian's permission.

With you consent, the ONLY information we would be providing to sign your son/daughter up for an online app is the following: (eg. Actual information to be named by the school)

- First and last name:
- School Name: **Crescent Park Elementary School**
- Student Number:

The above student information will be provided to establish account for: (eg. Actual applications to be named by the school)

- Google Apps

Together with this consent the teacher is required to provide to you in writing or face to face, a description of the app, their reasons for wanting the app and how it will be used in class, as well as the benefits and risks in using it (see attachment). This consent will inform you who will have access or store the personal information, and what will be done with it. In addition you will be informed of the jurisdiction in which the information will be stored or accessed.

It is important to note that the school will only provide the information named above. However, while the teacher will be monitoring the student's online communications and activities, any private information that students themselves provide while using an app may be beyond the ability of the teacher to control.

Student Name:

Parental Consent:

As the parent/guardian of the student named below, I grant permission for my son or daughter's private information (described above) to be provided for computer applications used for educational purposes. In doing so, I understand that the private information and my child's school work will be stored on servers that are often located in other countries. All information on those servers remains the property of the student however it will be regulated by the laws of the country in which it is stored.
